

## Who We Are

Alastrine is a startup company in the field of computer applications and services. Alastrine is a service provider of Web based Development & Web based Software development Solutions, Mobile Application Development. We have the experience & expertise to enable complicated business solutions. Our efficient and experienced team is greatest resource. Alastrine's infrastructure houses a team of young and competitive professionals having experience in Web Designing and software development who are dedicated to providing high-end solution to our clients. We develop software and website application with latest technologies and as per W3C standards. For website development projects, we also provide hosting and domain facility for customers, so they don't need to bother about that. Our Products and Services are user friendly with easy controls and are of superior specifications. We are always proactive to fulfil client's needs and requirements to the best possible extent of their satisfaction. We manage interactive sessions with clients throughout the project development.

We follow complete development life cycle by dividing all the processes in different phases like Requirements gathering & Analysis, Designing, Development-I, Development-II, Testing, Live, Deployment and Maintenance. We also provide choice for languages selection to the client.

In most of our projects, we have been providing free maintenance for the first leave of "GO LIVE" and will happily continue to do so.

Providing best quality work in time is our only motto. Best support to client and lifetime relationship with them is our main goal.

With warm regards and desire to serve you.
